

BENJI
Daniel Wehrli for
Studio by Mobimex

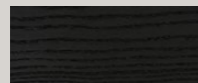

Die umlaufende Gestellstruktur in Massivholz kommt mit filigranen Querschnitten aus und bildet damit die Basis der linearen Gesamterscheinung. Die in ihrer Grundform klar gezeichneten, straff bezogenen Polster Elemente in Sitz und Rücken steifen die Konstruktion aus, unterstreichen das grafische Erscheinungsbild und bieten dabei einen hohen Komfort. Eine auf die unterschiedlichen Massivhölzer abgestimmte Stoff- und Lederkollektion ermöglicht vielfältige Farb- und Materialkombinationen.

The solid wood frame unfurls at elegant angles, giving the bench its distinctly linear appearance. The strong outline of the seat and backrest upholstery brings rigidity and intensifies the bench's aesthetic impact, without compromising on comfort. With a wide range of fabric and leather collections available to match the different types of solid wood, all manner of colour and material combinations are possible.
